SAP Business Analyst, Functional Consultant Production Planning

Scope of your role:

- Understand business requirements and analyze relevant processes in Production and Capacity Planning, for Make-to-Stock and Make-to-Order production scenarios
- Configure the SAP system primarily in PP, but also adjacent modules and processes having an impact on Production Planning and Execution, such as MM, QM, Warehouse Logistics and SD
- Prepare functional specifications for ABAP developments, define test scripts and be part of the various testing cycles
- Document system functionality and customizing, create application manuals, develop training materials, and perform user trainings
- Support the data migration team in mapping and validation of master- and transactional data
- Monitor system activities (e.g. update requests, locks etc.), interfaces (e.g. RFC/IDOC processing) and batch jobs, and ensure appropriate usage of the system
- Provide application support for business users, key users and subject matter experts
- As part of the implementation team plan, coordinate and perform work packages alongside the project roadmap

Your Qualifications:

- Degree in an IT related discipline e.g., Informatics, Business and Information Technology or equivalent
- **Several years of experience** in international SAP ERP implementation projects including (cross-module) customizing, ideally gained with SAP S/4 Hana. Must have proficient PP and MM customizing knowledge.
- In-depth understanding of the application lifecycle starting from functional analysis & design, configuration and development, software test, deployment to production and support
- Experience with Make-to-Stock and Make-to-Order production
- Very good knowledge of material master, control parameters, and configuration of MRP and CRP processes
- Cross-Application knowledge SAP ERP <> external Manufacturing Execution Systems and related interface technology is beneficial
- At least basic knowledge of ABAP development processes, debugging, and error analysis
- You enjoy working and traveling in an international team
- **Proficient English language knowledge** or at least B2 is mandatory, any other additional languages skills are an advantage.

Your Chance

- Permanent Contract in a continuous growing company with exciting international projects.
- International Project working remotely, after Covid every 2-weeks on-site in Poland for 3 days
- Working in a young motivated team with potential to growth to take over team responsibility
- Office Location: Bucharest / Romania
- **Starting Data: ASAP**
