

Let your business evolution set the pace of ABAP, and not the opposite.

How Crystal System Group's IT long-time expertise and its Talent Generation Methodology allowed the largest airline in Europe to increase its development capabilities, reduce costs and fly first class.

We're a team of high-skilled experts committed to being the best, most flexible, most scalable, and actively supportive IT consulting and engineering company.

With headquarters in Cyprus, and a turnover of EUR 15.000.000, Crystal System has software factories located in Romania, Moldova, and Albania, and is today the IT strategic partner to some of the most influential corporations in Europe.

We go beyond our line of duty to ensure the best outcomes and cost-efficiency for your business.

Our client

The largest airline in Europe in terms of passengers and distance, with one of the largest airline fleets in the world and flying to over 220 destinations.

Our client was **striving for supremacy** in a highly competitive market but had **limited internal resources and insufficient IT competences** to complete crucial ABAP projects. Expanding its pool of developers was a priority, but complexity and fragmentation were to be properly managed.

Crystal System Group started with a small pilot team of two specialists, but our relationship with the client soon evolved into a **structured technical and functional consultancy service** delivering custom solutions.

In time **Crystal System dedicated team has grown to 30 consultants** based in Bucharest, Chisinau, and Durres, **seamlessly fitting** into a multifaceted delivery process and **promoting its evolution.**

How did we achieve these results? Over the years, we built and tested a strong, reliable, and sustainable **Talent Generation Methodology** by partnering with leading European universities and offering advanced training programs to hundreds of IT talents. Amongst them, we only recruit the top 10 percent.

This allows us to create a **team of top-skilled talents** while expecting a **supportive, outcome-oriented mindset from our consultants.**

We believe in people, and we know that our distinctive "**quality pattern**" is in our DNA - it's the feature that enables us to **easily adapt** to our clients' needs, supporting their **evolution from within**, and to offer a **customized, reliable, modular service** within the framework of a **solid delivery model** and a strong professional culture.

As a team of high-skilled experts committed to being the **best, most flexible, most scalable, and actively supportive** IT consulting and engineering partner, we go above and beyond our duties to ensure the **best outcomes** and **cost-efficiency** for your business.

Put us to the test.

30 consultants seamlessly fitting into a multifaceted delivery process and promoting its evolution.
